

# Iuce XL6 multishop

The world at your fingertips

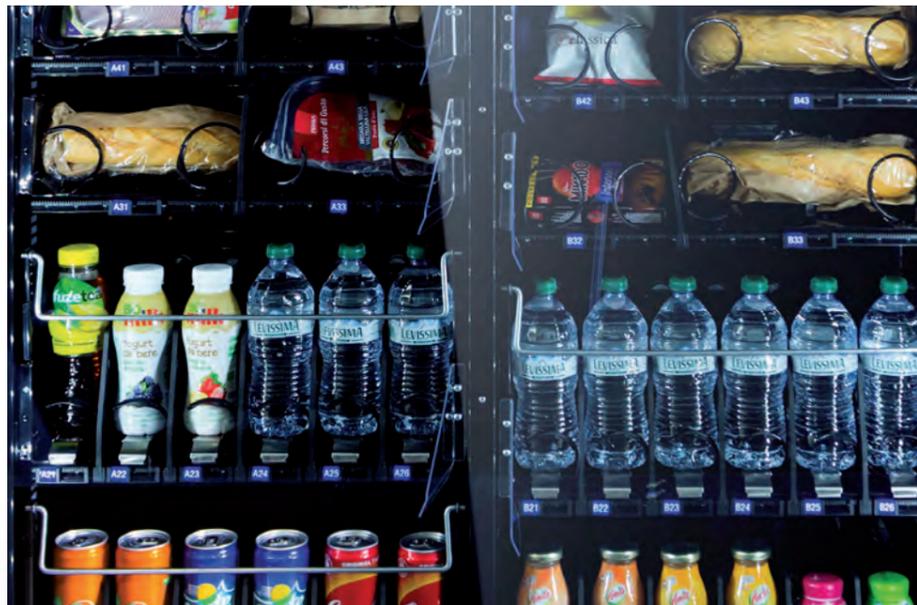

The machine features exceptional product capacity, enabling a wide variety of market applications in semi-public areas.

A self-contained convenience store, snack shop, hotel boutique, or 24/7 non-food retailing concept.

# a world of advantages

## High product capacity

Luce XL6 is a new machine that can supply a very high number of products and type. A Multishop machine capable of delivering up to 84 selections in a 2-column configuration equipped with 6 drawers each. (7 on demand)

## Lighting design

With a wide and well-illuminated window for better product visibility, Luce XL6 Multishop features Rheavendors' patented Vivilight technology, an innovative and highly efficient LED system that provides a view of the products that is both clear and alluring

## Always ready to sell

The machine is designed to be one of the largest in this category for semi-public places (hotels, train station airports). Ideal for open sales points where durability, loading capacity and product variety are a must, Luce XL6 Multishop has a maximum capacity of 1,680 items, from snacks and bottles to non-food products.

## Environmentally friendly

Thanks to our patented Vivilight system, our machine offers the opportunity to minimize energy consumption by adjusting brightness and temperature on timed settings. This enables you to carry on with your business while maintaining environmental compliance.

## Machine features

Luce XL6 Multishop includes Rheavendors' patented Flexspir system, which makes space between spirals adjustable to the millimeter, thus allowing all selections to be configured to suit any need, and also gives you the possibility of combining one or more motors (twin motors).

## Safety and robustness for your business

Despite its stylish external appeal, Luce XL6 Multishop is a very robust and durable machine. The coin collection area is equipped with a motorized sliding anti-vandalism and anti-theft system, as well as an FTCA sensor for product dispensing. (A magnetic gasket improves door and chassis adherence.) Secure door with 6 fastening point.

## User interface

In order to ensure a simple and easy experience for the end user, Luce XL6 Multishop features an alphanumeric touch keyboard with K-sense capacitive technology, with LED lights for simple and secure operation.

## Internal modularity

As for the internal temperature of the machine, Luce XL6 Multishop is characterized by a stratified and adjustable internal temperature reaching 3°C in the food zone, as well as a spacious refrigerated stock area.

## A perfect couple

Luce XL6 Multishop is designed to stand alongside any of our Luce Zero and Luce X2 freestanding machines.
