Elements and positioning.

modul<on

Configurator.

An easy and intuitive system which allows you to create your desired modul<on configuration.

Each modul<on can be identified thanks to a nomenclature system based on the single elements which compose the module itself. This solution ensures an easy way to recognize the set up of the selected module in every phase of the process, from the order to its production and shipment, from installation to maintenance.

Thanks to our configuration system, it is also possible to identify the rheavendors models which can be paired with our modules and where to place them. We strive for efficiency and clarity to make the management of the your modules extremely easy.

modul<on

Product Range.

*A range of modular solutions with specific functions, ideal for coping with every need.
5 module families designed to combine with rheavendors table top machines.*

From different size cups to drawers, from water tanks to fresh milk machines, from lid and teabag dispensers to change givers...

No matter what you or your customers need, our modul<on system and machines ensure that the end user enjoys an exclusive, high-performance product range.
